INTERNET CONFIRMATION/ERROR LAYOUT

This record is used to notify the provider of the outcome of the Internet records submitted for the current cycle. Both accepted records and rejected records will be contained in this file.

There are several reasons for not creating a claim: records missing, fields missing or invalid.

• Confirmation records will not populate the Error Message field.

• Error records will not populate the ICN (except for errors on Internet Credit records), claim type, billed

amount, paid amount, reason code1, and reason code 2.
