

TPL VENDOR RECORD LAYOUT MANUAL

OVERVIEW

This manual contains various record layouts designed to assist the Third Party Liability (TPL) Vendor in sending and receiving files between Wipro Infocrossing and the TPL Vendor. All data exchanges, regardless of the originator, must be electronically transmitted.

Layouts sent by Wipro Infocrossing to the TPL Vendor

1. Daily (sent to TPL Vendor by 8:00 AM):

TPL Non-verified Lead File

2. Regularly, as a response to a TPL Vendor submission:

Insurance Company Confirmation file

Verified Coverage Reject file

3. Bi-Monthly Medicaid Management Information System (MMIS) Reconciliation Files:

MMIS TPL Policy File

MMIS Insurance Coverage Type File

MMIS Insurance Company File

Layouts sent by the TPL Vendor to Wipro Infocrossing

1. Regularly, at least twice a month:

Verified TPL Policy file – reference the X12 Unsolicited 271 Technical Report 3 (TR3) and 271 Unsolicited Companion Guide

2. As needed

Insurance Company file

The file layouts noted above are detailed in the following layouts. The Data Definition Table, at the end of this guide, provides the valid value information for the value represented in the Table ID column.

Default: Spaces.

NOTE: If a policy contains both Subscriber and Dependent information and only Dependent errors are found (no errors are found at the Information Receiver or the Subscriber level), the Subscriber policy is added to the MMIS TPL tables. The Verified Coverage Reject file will show a reject status due to the rejection of the Dependent Policy update. In order to correct and add the Dependent policy information it will be necessary to send a delete transaction first, so the Subscriber policy is deleted. Then send add for the Subscriber and Dependent again. Failing to do so will result in the whole record rejecting as a duplicate.
